PERSONAL STATEMENT

I've always been drawn to the way technology connects people and ideas. As a computing graduate, I'm passionate about learning new tools, experimenting with creative solutions, and finding better ways for users to interact with what we build. I thrive in team environments where communication and shared problem-solving matter, and I bring a thoughtful, empathetic approach to every project I work on. My goal is to keep growing both technically and personally while contributing to projects that make a difference.

SKILLS

- Led multiple group projects by keeping everyone connected, encouraged open discussion, and made sure every voice was heard.
- Comfortable talking with people from all walks of life. I enjoy turning communication into strong bonds and connections.
- Confident and on-focus when in high pressure environments.
- Love learning new things and finding my rhythm quickly in new environments.
- Take pride in keeping my workspace tidy and organized, it helps me think clearly and work efficiently.
- Naturally empathetic and attentive listener who makes sure to understand before responding.

EDUCATION

BSc (HONS) Computer Games Development **2:1** **May 2025**

University of the West of Scotland

- The course covered principals such as C# Games Development, PlayStation 5 Games Development, Creating 3D assets, and Project Management.
- Dissertation on "Investigating art style in a simulated environment to maintain engagement".
